Education

University Of Engineering And Management, Kolkata — WB, India
Bachelor of Technology in Computer Science and Engineering — Sep 2017 - June 2021
CGPA: 8.5

Experience

L&T Technology Services| Senior Engineer — Bengaluru, India | Jul 2026 - Present

- Contributing to the **OneTech India** transformation program at **TotalEnergies**, supporting the integration and modernization of digital energy solutions.
- Designing, developing, and enhancing frontend applications for **Integrated Power Management (IPM)** and **Grid Integration** platforms.
- Collaborating with global cross-functional teams including product owners, architects, and backend developers to deliver scalable, high-performance energy management solutions.

Esyasoft | Senior Software Engineer — Bengaluru, India | Sep 2025 – Jun 2026

- Developing and maintaining a React-based billing system for gas and **smart meter** infrastructure, ensuring accurate and efficient utility billing.
- Collaborating with cross-functional teams to implement scalable features, optimize system performance, and enhance user experience for smart metering solutions.

Rebel Foods | SDE I — Bengaluru, India | Sep 2024 - Sep 2025

- Spearheaded development and optimization of EatSure's platform using **React with Server-Side Rendering (SSR)** to improve performance and SEO for core user journeys.
- Integrated **Amplitude**, **MoEngage**, and **Singular** for cross-platform analytics, enabling actionable insights that improved customer retention and informed business strategy.
- Engineered **RESTful API integrations** for seamless order placement and payment flows, enhancing reliability and reducing latency in high-traffic scenarios.
- Collaborated with the **Trax team** to deliver the **Universal Tracking Screen**, providing real-time order updates and significantly enhancing post-order transparency for users.
- Contributed to the **QuickiES** (15-Mins OR FREE) fast food delivery platform, building critical frontend and backend components using **React** and **Express.js**, ensuring quick, responsive interactions under tight SLAs.
- Key contributor to **The 500 Calorie Project**, a subscription-based D2C platform built on EatSure; handled **UI/UX** and **subscription flow integrations** for health-focused offerings.

INNsight | React Js Developer — Ahmedabad, India | Mar 2023 - Sep 2024

- Developed **theme-based** customizable website templates, improving user experience and accelerating development cycles.
- Transformed a monolithic React app into a **micro frontend architecture**, enhancing modularity, scalability, and maintainability.

BDIPlus | Software Engineer — Bengaluru, India | Oct 2021 - Apr 2022

- Core team member in building **OneData (Enterprise Data Management)** using **React** and **Material UI**, adopted by major clients including **AMEX**, **E-Trade**, and **SBLI**.
- Integrated key services like **Google Analytics**, **Stripe**, **reCAPTCHA**, and multiple third-party **REST APIs**, enhancing functionality and security.

PricewaterhouseCoopers (PwC) | Associate — Kolkata, India | May 2021 - Oct 2021

- Self-learned and implemented **React.js** in a personal project, demonstrating ability to build **dynamic and responsive web applications**.
- Utilized **Microsoft Excel and Word** for in-depth **data analysis and reporting**, supporting strategic decision-making.

Skills

Languages: JavaScript, TypeScript, SQL, C, HTML5, CSS3
Frontend: React, Next.js, Redux, Recoil, Bootstrap, Material UI
Backend: Node.js, Express.js, FastAPI
Databases: PostgreSQL, MySQL, MongoDB, Redis
Testing: Jest, React Testing Library (RTL)
Cloud: AWS

Projects / Open-Source

ResumeIQ | Source Code *React, zustand, Tailwind, Puter.js*
An **AI-powered** resume analysis platform that helps job seekers improve their resumes with **ATS scoring**, smart insights, and personalized, actionable **feedback**.

SnapLnk | Source Code *React, Tailwind, Supabase*
A **modern link shortening platform** that helps creators share smarter links with **real-time tracking**, clean **analytics**, and **audience insights**.

ZapStock | Source Code *React, Bootstrap, Recharts*
A frontend-focused **product dashboard** built using React and Vite, featuring localStorage-based data handling and **interactive charts** powered by Recharts.

ByteJournal | Source Code *React, Express.js, MongoDB, JWT*
ByteJournal is a **MERN stack blog application** featuring a Reach Editor for creating posts. It includes a login and registration system with **JWT authentication**, providing secure access and a seamless user experience.

Shop. | Source Code *React, Module federation*
Developed an **E-Commerce application** utilizing React with a **micro frontend architecture** and **module federation**. This approach ensures scalable, independent modules, enhancing flexibility and maintainability throughout the application.

Notoora | Source Code *React, Typescript*
A modern React & **TypeScript** note-taking app with a clean, responsive UI. Features include creating, editing, deleting, and organizing notes with tags and **Markdown support**. Data is stored in LocalStorage, and React Router enables smooth navigation.

Certifications

- Version Control - **Meta**
- JavaScript Algorithms and Data Structures - **freeCodeCamp**
- Namaste React - **Namaste Dev**
- Namaste Javascript - **Namaste Dev**
- React(Basic) - **HackerRank**
